

Andrii Krasavin

Sholom Aleikhema 5, Kyiv, Ukraine, 04210 | +38 (063) 887-6007 | andrii.krasavin@gmail.com

With more than 15 years of experience in game development, I am passionate and driven to create the best games possible, more than ever. I specialize in level design, world design, and team leadership across AAA projects. I have led pre-production, production and post-launch phases, built and mentored design teams, developed pipelines, and contributed to shipped titles including Metro Exodus, Far Cry 6 and more. I am passionate about creating immersive worlds, supporting visual direction, and bridging design with art and production to deliver polished player experiences.

Specialties

- Leading, managing, coordinating and mentoring design teams.
 - Handling dependencies, planning, feedback loops, reviews and multi-discipline collaboration.
 - Great knowledge of development cycle and pipelines– from pre-production to released and well supported games.
 - Deep understanding of the level design for different genres. Level design direction, development and implementation from concept to release.
 - Gameplay design.
 - Development and support of the visual direction and art style for the project.
 - Visual scripting for unique and systemic events.
 - World composition, environment and lightning art.
 - Toolset and UX research and improvements.
-

Experience

SENIOR LEVEL DESIGNER (CONTRACT) | ATOMIC ARCADE, HASBRO | OCTOBER 2025 – FEBRUARY 2026

G.I. JOE Snake Eyes Game

- Designed world layout for a large section of the playable area
- Created and iterated on a universal LD kit used for functional blockouts
- Developed multiple major locations, including paper design, prototypes, and functional blockouts ready for the art pass
- Bridged Level Design and Environment Art teams to implement and test pipelines in production

Lead Level Designer | Room 8 Group | November 2022 – October 2025

G.I. JOE Snake Eyes Game - Co-developed the project with Atomic Arcade

- Led full pre-production cycle for a new project
- Formed and managed the Level Design team
- Designed level and world design pipelines
- Defined principles for locations, biomes, gameplay rules, and metrics
- Collaborated closely with the Game Director to shape Level Design flow and needs according to project goals
- Established an internship program to find and grow new talent
- Mentored Level Design team members

Lead Level Designer | 4A Games Ukraine | February 2021 – November 2022

La Quimera

- Co-led the Level Design team
- Provided advisory and consultation support through scheduled reviews
- Designed and implemented complex level layouts, mission events, scenarios, and PvE encounters
- Conducted end-game cycle research, design, and development

Unannounced Project

- Led and managed the Level Design team
- Ran full pre-production cycle for a new experimental project
- Defined art and gameplay direction for a new IP
- Developed and implemented the game world
- Built and managed the Level Design team

Level Designer | Ubisoft Toronto | September 2019 – February 2021

Far Cry 6

- Designed and implemented complex level layouts, mission events, and scenarios for both open-world and narrative-driven gameplay
- Designed gameplay features for unique narrative events
- Created visual scripting for mission events, encounters, and scripted sequences
- Performed initial narrative passes for missions
- Created and maintained documentation for implemented missions and features

Senior Game Designer | 4A Games LTD | January 2018 – September 2019

Metro Exodus

- Designed levels, gameplay systems, encounters, and interactions
- Handled lighting and environment art from placeholder to final polished state
- Designed and implemented the main menu and its environments
- Managed and mentored part of the design team
- Created and adjusted pipelines in close cooperation with lead designers
- Designed and implemented boss encounters
- Set up cinematics and narrative sequences
- Improved in-house editor UX

Game Designer | 4A Games LTD | June 2015 – January 2018

ARKTIKA.1

- Designed levels, gameplay systems, encounters, and interactions
- Designed and implemented boss encounters
- Created UX design for Oculus Touch controllers
- Handled lighting and environment art
- Designed features to implement VR support for the in-house engine
- Managed outsourcing
- Supported the project marketing campaign

Lead QC | 4A Games Ukraine | July 2014 – June 2015

Metro Redux/Metro Exodus

- Managed the QA department
- Improved department pipelines
- Developed and maintained Jira workflows according to team needs
- Designed in-house tools for compliance testing support

Senior QC | 4A Games Ukraine | January 2012 – July 2014

Metro Redux

- Validated new content, features, and fixes for both quality and functionality
- Submitted professionally written feedback on balance and design
- Developed, supported, and implemented test cases into QA workflow
- Handled compliance features development and testing for console releases
- Developed, planned, and executed compatibility testing

QA | 4A Games Ukraine | August 2011 – January 2012

Metro: Last Light

- Tested the title according to existing test cases
- Used creative methods to identify bugs
- Addressed testing requirements based on findings
- Wrote bug reports
